PROFESSIONAL SUMMARY

•With experience as a junior developer, I have honed my skills in Python,JavaScript, HTML, CSS, C++, React, and Node.js, delivering several successful web applications for clients.

•My top strengths include strong problem-solving abilities, excellent communication skills, and a drive for continuous learning to stay up-to-date with the latest technologies.

•I seek an opportunity to work in a collaborative environment where I can further develop my technical expertise while contributing to impactful projects that make a difference.

EXPERIENCE

Junior Web Developer, Greatest Interactive

- As a junior developer, worked closely with senior engineers to build practical experience in JavaScript, React, and Node.js, contributing problem-solving skills and a willingness to learn, while delivering high-quality code for various web applications.
- Collaborated with cross-functional teams to design and implement an immersive 3D gaming experience, incorporating cutting-edge technologies and agile methodologies, culminating in the game's successful launch and positive critical acclaim.
- As a software project manager, fostered a collaborative environment with cross- functional teams, implementing agile methodologies and efficient processes to maximize productivity, resulting in the timely delivery of high-quality software solutions.

EDUCATION

Bachelor of Business Information Technology   ***2022 - Date***
Multimedia University of Kenya

Kenya Certificate of Secondary School,K.C.S.E   ***2018 - 2021***
The Kenya High School

SKILLS

Technical Skills:
- Proficient in Python programming language with a strong understanding of data structures, control flow, functions, and object-

oriented programming concepts.
- Experience working with Python libraries and frameworks such as NumPy, Pandas, Flask, and Django.
- Familiarity with version control systems, particularly Git, and collaborative development workflows.
- Commitment to writing clean, well-documented, and testable code adhering to best practices and coding standards.
- Basic knowledge of databases (SQL and NoSQL) and their integration with Python applications.

Exposure to agile methodologies and common development tools

Soft Skills:
- Problem-Solving Skills: Adept at breaking down complex problems into smaller components, analyzing requirements, and developing efficient solutions through logical reasoning and creative thinking.
- Communication: Possess strong verbal and written communication abilities to clearly articulate technical concepts, document code, and present solutions to stakeholders.
- Adaptability: Eager to continuously learn and quickly adapt to new technologies, frameworks, and programming paradigms as required.
- Time Management: Adept at prioritizing tasks, meeting deadlines, and managing multiple responsibilities simultaneously.
- Analytical Mindset: Capable of critically analyzing data, identifying patterns, and drawing insights to inform decision-making processes.
- Collaboration: Skilled in working effectively within a team environment, contributing ideas, and coordinating efforts to achieve shared goals.
- Attention to Detail: Committed to writing clean, well-documented, and maintainable code by adhering to best practices, coding standards, and thorough testing.
